Hello Aspen Cove,

This weekend I was able to visit Aspen Cove and look for lots that needed attention to the thistle weeds. During my visit I stopped at my own lot to check to see if I had any thistle weeds and from the road it appeared I didn't have any issues. After walking my lot, I discovered I had several thistle weeds that needed to be taken care of. I also notice that the thistle weeds are just about to go to seed, if you don't want a bigger problem next year, I would suggest all members of Aspen Cove get out and remove the weeds ASAP.

We have several areas of our commons area (sports court area, front gate, near the water tank) that I noticed had the thistle weeds that need attention. Allen Rowe from the HOA board was kind enough to spray the weeds but if you happen to be up in Aspen Cove in the next couple of weeks and have a few moments to spare please help us all out and take a shovel to any weeds he might have missed. Again, a little work now prevents major work in the future.

Big thank you to those of you who have been able to remove the thistle weeds from your lot. Below is a list of lots that I noticed had thistle weeds on their lot. Again, I am only checking from the road so just because your lot is not listed doesn't mean you don't have some.

97 (my own lot)

Again, for those in the back row, I am only doing the inspection from the road and can guarantee this list is NOT all encompassing. Please get out and do a check. Let's all do our part to keep Aspen Cove beautiful.

Heath Pulham
